

About Us

"Perli Construction", one of the most experienced organizations in the construction sector in the Alanya region, and was established in 2000.

Since that time it has been continuing its activities in the construction sector, especially apartments, housing, villa and business centers. Perli Construction operates also in the agricultural sector. During the last 20 years, 14 projects consisting of residential villas and business centers have been completed and have made an investment of 200.000 m2 greenhouse cultivations in the agricultural sector. Although we are an experienced company we are dealing with modern standards, innovative, reliable and a trustable way of working.

With residences built in Alanya Incekum region, we have made hundreds of families' satisfied homeowners. Perli Construction is known because of fulfilling all its commitments on time concerning the projects.
