

## **MONARCH STRUCTURE**

Architect of the Future

It is a young and dynamic organization where our partners share their experience of more than 25 years both in Turkey and abroad.

This formation, which conveys the knowledge and experience gained by the construction on its face,

which has been completed in a wide range of services such as urban planning, housing, hospital, hotel, shopping center, and type projects, serves in the field of

residence and living. Our company has set itself the goal and target to offer the best by exceeding the service bar raised by today's conditions and international competition with its customer and quality-oriented perspective.
