

## About us

Demirbağ İnşaat has been continuing its works in Istanbul, Antalya and Cyprus since 1963. Since its establishment, it has completed nearly 110 projects in many different areas such as residences, schools, hospitals, hotels, fuel stations, and completed 8 projects in three different cities in the last two years.

Our company was established in Istanbul and mainly serves in Bağdat Avenue on the Anatolian side of Istanbul. However, it has grown over time and started to operate in important regions of Antalya Cyprus.

Innovative and environmentally sustainable, without compromising robustness, quality and occupational safety, is the basis of our projects. We attach importance to reflecting the same quality in all our projects by maintaining our expert staff and providing the required workmanship for the project and maintaining the stability.

Our primary goal is to deliver our constructions on time in accordance with the project and the expectations of our customers, without giving up on the reputable merchant identity and principles of our founder, the benevolent Hasan Basri DEMİRBAĞ, as well as maintaining our reliability.

We will continue to design and implement our high quality and innovative projects with our board of directors and professional staff.
